

## Reliability, higher efficiency, energy savings.....

Aquair can provide all of your HVAC, Mechanical Services, Water Treatment and Air Conditioning servicing requirements.

The onus of responsibility is now firmly placed on building owners, Company Directors, or Building Occupiers to provide buildings and services that are correctly maintained and operate in a safe & efficient manner. Legislation requires a level of servicing, frequency and methods of service. Aquair can provide all servicing requirements for Air Conditioning, Mechanical Services and Water Treatment plants including maintaining and updating service records, to ensure regulatory authorities requirements are met.

### Benefits of Regular Service & Maintenance

- Extended plant running life
- Improved reliability
- More efficient operation
- Less breakdowns
- Reduced costs
- Reduced risks (i.e. exposure to litigation)
- Compliance with statutory regulations
- Environmentally friendly
- Reduced energy consumption
